3. Consultation on homogenization

The 2 documents for the consultation were presented.

Each expert from ET-DDS should send if possible products and/or climate services from their NMHS that use homogenized data (e.g. Climat Bulletin, Trend on past data, Diagnostic on climate change, Integration Past-Present-Future data, model's alignment).

[Document 1](#) on the structure of the consultation: numerous exchanges between experts. A new version of the document reflecting the discussions will be made available.

[Document 2](#) on the main talk on homogenization: The expected duration for this talk and dates for the consultations will be setup before our next meeting in April 2025.

The consultations should be more focused on developing countries.
