Meeting TT-TDCF / ET-DRC, 27 January 2022

Jitsuko Hasegawa, Sergio Ferreira, Denis Stuber

(1) Sending of ASCII files DAYCLI to TT-TDCF

- ✓ French stations OK
- ✓ NOAA stations in process to send back to Jay Larymore
- ✓ ET-DRC follow the countries that answered to the practices with DAYCLI message and ask them to send test files in ASCII to TT-TDCF (Sergio)
- ✓ TT-TDCF: send back the ASCII files to the countries after coding and decoding.
- ✓ Countries check that the BUFR is created as they intended and send their comments to TT-TDCF and to ET-DRC.

(2) Document / Training material for the DAYCLI message

- ✓ Finalize the current document with TT-TDCF and ET-DRC
- ✓ Contribute with the SERCOM with its ET on Capacity Development on training material

(3) Other ideas

- ✓ To discuss with SC-IMT about implementation of the DAYCLI message including monitoring
- ✓ How to involve CBS Lead Centre for GCOS?
- ✓ Communication plan to start toward WMO Members about the DAYCLI: format, implementation schedule, etc. including Regional information or training session (with the help of Regional Associations)
