Agenda

1	Data Rescue for Libya (Ali, Alessandro Ceppi and Veronica Manara)	2
2	ET-DDS transfer to INFCOM (Reinaldo and Denis)	2
3	WMO-No. 1238 and INFCOM-4 documents (Peng)	2
4	Standards at the European Committee for Standardization (CEN) and at ClimatEurope2 (Alessandro)	3
5	ACRE Conference on Climate Services (Denis)	3
6	Exchange summary with the Global Hydrological Data Centres, TT-GloHyDaC, HydroSOS (Markus)	3
7	Guidelines and activities to support RCCs (Peer)	3
8	Towards updating climate extremes indices and reinforcing SoC reporting (Robert)	3
9	Next consultation on Maturity Matrix (Peer)	3
10	AoB	4
11	Date of next meeting	4
12	Coming events	4

Participants:

Name	P*	Name	P*	Name	P*
Mr Alessandro Spinuso	*P	Mr Jose Guijarro	*P	Ms Sandhya Dindyal	
Mr Ali Eddenjal	*P	Mr Markus ZIESE	*P	Mr Tursyn Tillakarim,	
Mr Axel Andersson	*P	Mr Peer Hechler	*P	Mr Urip Haryoko	*
Ms Cathy Smith		Mr Rachid Sebbari	*P	Mr William Wright	*P
Mr Denis Stuber	*P	Mr Reinaldo Silveira	*P	Mr Byungjun Kim	*P
Ms Ge Peng	*P	Mr Robert Dunn	*P		

*P: Present

Notes: actions and agreements highlighted in **bold**.

1 Data Rescue for Libya (Ali, Alessandro Ceppi and Veronica Manara)

Ali provided an overview of the status of data rescue in Libya. The country has a solid approach to data rescue, yet progress is slow due to resource constraints. Observational data from weather stations are still received on paper. Help is needed to accelerate data rescue. Libyan data have also been discovered in international data archives.

Alessandro Ceppi (Pegaso University) and Veronica Manara (University of Milan) presented the Italian project *Dieci et Lode*

3 to rescue data from other countries, which are stored in Italy. The effort includes data from Libya, Ethiopia and Eritrea. *Dieci et Lode* includes the use of OCR for printed data and Citizen Science for well-ordered manual observations. See the Presentation [here](#).

Peer acknowledged the data rescue activities as an excellent collaborative approach to help Members digitising and completing their national climate data record.

ET DDS is ready to support the collaboration with expertise, as appropriate.

2 ET-DDS transfer to INFCOM (Reinaldo and Denis)

Rémy Giraud Chair of the Standing Committee on Information Management and Technology (INFCOM) informed us with the following e-mail on the 25/08/2026:

"I would like to inform you, officially, that by the decision of P/INFCOM and P/SERCOM, of the transfer of ET-DDS to SC-IMT. It was decided not to modify the team or its ToR on the short term. So, for INFCOM4 we will continue with the existing teams (ET-IM, ET-DDS and TT-GHYDRAC) as they are.

We will work together on how to structure the work between the teams and to avoid any overlap or gaps. We have a bit of time for that. We may (will ?) have a face to face meeting of all chairs early 2027 to discuss the best possible way forward for the benefit of Members.

I am suggesting having a short virtual meeting in September between all people receiving this email to prepare for the coming months."

Reinaldo and Denis summarized the SC-CLI meeting on the 8/09/2026, and the necessity to ensure a clear and sustained link between climate-service requirements (WHAT) and technical implementation (HOW), including appropriate coordination between SC-CLI and SC-IMT.

3 WMO-No. 1238 and INFCOM-4 documents (Peng)

Peng informed that ET-IM related documents have been submitted to INFCOM in late August. The SC-IMT chair made a few comments that have been discussed and addressed.

Peer informed that INFCOM documents will be available here: <https://meetings.wmo.int/infcom-4/SitePages/Session%20Information.aspx>. Climate-data relevant documents include an update of WMO-No. 1238: Manual on the High-Quality Global Data Management Framework for Climate, mention of the CDMS functional requirements, an extension of GBON to include climate reporting (CLIMAT) and the need for WMO recognised global climate data centres. INFCOM-4 documents should be finalized and available about 45 days prior to the session.

Both Peer and Peng think it would be good to go over items that are relevant to ET-DDS after INFCOM-4.

4 Standards at the European Committee for Standardization (CEN) and at ClimatEurope2 (Alessandro)

Alessandro provided an update of ClimatEurope 2 ([cf. Slides](#)). The presentation provided an update on Climateurope2's contribution to European climate-services standardisation, including its engagement with CEN–CENELEC. It highlighted recent WP2 work on data and processes, with recommendations based on literature, interviews, and case studies addressing metadata and technical standards, provenance and traceability, uncertainty communication, and quality management. The related project deliverables are linked to their Zenodo pages, where they are publicly available. These results are now being synthesised through collaborative thematic workshops into higher-level messages and priorities to inform upcoming standardisation activities.

5 ACRE Conference on Climate Services (Denis)

Denis informed the Team of the presentation that will be provided at the upcoming ACRE Conference ([cf. https://aisam.eu/acre2026/](https://aisam.eu/acre2026/)). The talk is scheduled for Wednesday 16th September 2026 12:00: “*From Observations to Climate Services: The Journey of one observation*”. It includes activities from ET-DDS, ET-MCCVC, ET-CIDS and ET-CDC. The StoryLine and StoryBoard have been finalised by all four ETs and the presentation will be finalized by the end of this week.

6 Exchange summary with the Global Hydrological Data Centres, TT-GloHyDaC, HydroSOS (Markus)

- An update was shared on the discussions of the Task Team on Global Hydrological Data Centres, including the roles and functions of data centres covering groundwater, lake water, water quality, water isotopes and runoff.
- It was noted that discussions are ongoing on data collection, storage and backup, access and sharing among Members, and linkages and data exchange among data centres. The possibility of broadening the scope from hydrological data centres to climate data centres is also being considered.
- A report on the discussions is being prepared for submission to INFCOM-4.

7 Guidelines and activities to support RCCs (Peer)

- ➔ Peer to schedule and prepare a joint 1-hour meeting with ET MCCVC in November to review guidance for WMO RCCs regarding their mandatory data and monitoring functions with a view of strengthening their contributions to WMO's State of the Climate reporting
- ➔ A short preparatory internal discussion may be held beforehand to clarify the requirements for RCCs and consider their engagement in the joint meeting.

8 Towards updating climate extremes indices and reinforcing SoC reporting (Robert)

Robert presented an update on the workshop in the UK (6-8 October 2026). Led by ET-MCCVC, this will look to incorporate monitoring of extremes into the WMO SoGC. Workshop will address existing WMO extremes metrics (ETCCDI/ET-SCI indices) and also investigate new ECVs and metrics. An expression of interest note was circulated among ET DDS members earlier in the year, and workshop links to ET-MCCVC action led by Blair Trewin (BoM) on refreshing the existing indices which was presented at an earlier ET-DDS meeting.

Online participation in the workshop is possible.

9 Next consultation on Maturity Matrix (Peer)

Based on the Secretariat's budget considerations and the practical preparations required, it is being considered to hold the consultation in the first quarter of next year.

10 AoB

Jose informed about his expert feedback to a request from the Syrian NMHS re climate data homogenization.

11 Date of next meeting

4th November 2026, 13:00-15:00 Geneva Time

12 Coming events

- ✓ 16-18 September 2026: ACRE, [Atmospheric Circulation Reconstructions over the Earth](#) (Rome)
- ✓ 19-23 October 2026: [SERCOM-4](#)
- ✓ 23-27 November 2026: [INFCOM-4](#)
- ✓ 1-5 March 2027 (tbc): Executive Council 81
- ✓ 14-25 June 2027: WMO Congress
- ✓ 5-9 July 2027 (tbc): Executive Council 82
- ✓ Early 2028: SERCOM-5
