Agenda

1 Standards of the European Committee for Standardization (CEN) and ClimatEurope2 2
2 ACRE Conference 2
3 SERCOM-4 overview 3
4 ET-DDS activities and future arrangements 3
5 INFCOM-4 3
6 DAYCLI Guidelines 4
7 What about Pacific for CDMSs, DAYCLI, Data Quality 4
8 Activities suggestions for 2027-2028 4
9 AoB 4
10 Date of next meeting 5
11 Coming events 5

Participants:

Name	P*	Name	P*	Name	P*
Mr Alessandro Spinuso	P	Mr Jose Guijarro	P	Ms Sandhya Dindyal	
Mr Ali Eddenjal	P	Mr Markus ZIESE	P	Mr Tursyn Tillakarim,	
Mr Axel Andersson	P	Mr Peer Hechler		Mr Urip Haryoko	P
Ms Cathy Smith		Mr Rachid Sebbari		Mr William Wright	P
Mr Denis Stuber	P	Mr Reinaldo Silveira	P	Mr Byungjun Kim	P
Ms Ge Peng		Mr Robert Dunn			

*P: Present
Notes: actions and agreements highlighted in **bold**.

Invited: Nakiete Msemo (WMO Secretariat).

1 Standards of the European Committee for Standardization (CEN) and ClimatEurope2

News from CEN:

- Technical Report 18365 'Adaptation to climate change - Guidelines on using climate data in infrastructure standards' has been published.
- Standard EN 18420 'Climate Services – Principles, requirements and guidance', at a Working Draft stage, ready for internal CEN review.
- Work has started on the standard EN 'Climate Services - Management and processes.

Nakiete Msemo presented the link between WMO and the ClimatEurope2 project:

- https://climateurope2.eu/news-events/events/events/the-final-climateurope2-webstival
- The Final Climateurope2 Webstival — ClimatEurope2 : What We've Learnt, Where We're Going

Alessandro Spinuso shared the following links and gave information on:

- https://climateurope2.eu/resources/public-deliverables
- https://climateurope2.eu/guidelines-standards/key-messages

Denis STUBER shared highlights from the EUMETNET "Climate Services Exchange" meeting of the 03/11/2026", including presentations on accessible climate information, Ireland's National Framework for Climate Services, European standardization, and the experience of Switzerland's National Centre for Climate Services.

2 ACRE Conference

Wednesday 16th September 2026 12:00: "*From Observations to Climate Services: The Journey of one observation*". was presented by Denis at the ACRE Conference (cf. https://aisam.eu/acre2026/). The talk includes activities from ET-DDS, ET-MCCVC, ET-CIDS and ET-CDC. Presentation, abstract, storyboard and references are available on the ET-DDS Wiki at : ET-DDS: Trainings, Conferences, Assistances · ET-DRC/Home Wiki · GitHub .

All ACRE presentations on Data Rescue, Artificial Intelligence, Data Management and analysis, etc. are available on the ACRE website: Aisam | ACRE2026

3 SERCOM-4 overview

3.1 General outcome

SERCOM-4 (Geneva, 19–23 October 2026) was marked by significant disagreements on several proposed technical documents. In particular, the US delegation requested changes to terms including “climate change”, “gender”, “inclusive” and “sustainable development”. Some documents could therefore not be adopted by consensus and may require further consideration, including at Executive Council level.

3.2 Data Rescue, homogenization and Climate Data Stewardship

Two documents were particularly relevant to ET-DDS:

- Document 3.1 – Proposed amendments to the description of the Services Programme.
- Document 7.2 – Revision of SERCOM subsidiary bodies.

The agreed text in Document 3.1 explicitly includes data rescue, data quality and homogenization in the Climate Services section. It calls for climate data availability, quality, continuity and fitness for purpose to be strengthened through international coordination and expertise in climate data stewardship, data rescue, data quality and homogenization, in close cooperation with INFCOM and other relevant WMO bodies.

This confirms that these activities remain part of the climate-services domain, while recognizing the need for cooperation with INFCOM.

The proposed revision of SERCOM’s subsidiary bodies was not adopted because consensus could not be reached on specific terminology. The existing structure, governed by Resolution 3 (SERCOM-3) and subsequent relevant decisions of the SERCOM Management Group, therefore remains in force.

4 ET-DDS activities and future arrangements

The WMO Secretariat is considering a meeting of SC IMT, SC CLI, ET IM and ET DDS in the first quarter of 2027. This meeting is expected to agree on the arrangements around the current ET DDS activities.

5 INFCOM-4

5.1 ET-DDS versus ET-CDDS

A new expert team appears under Standing Committee on Information Management and Technology (SC-IMT): ET-CDDS, Expert Team on Climate Data Development and Stewardship. Its purpose: “develop and maintain standard and recommended practices and guidance on the stewardship of climate data across its full life cycle – data rescue, quality control, homogenization, archiving and long-term preservation.” See INF. 7.2 of INFCOM-4.

5.2 WMO-No. 1238

The update of WMO-No. 1238, “Manual on the High-quality Global Data Management Framework for Climate”, has been postponed to INFCOM-5. One reason for the postponement is the intention to incorporate recommendations from the Task Team on Climate Infrastructure.

William Wright raised the possibility of asking the WMO-No. 1238 writing committee to review the full document, including its treatment of entities and centres.

5.3 CDMS functional and non-functional requirements

The document “Climate Data Management System Functional and Non-functional Requirements” is expected to undergo a six-month public consultation. The consultation will be open to WMO Members, HMEI member companies and other stakeholders. SC-IMT will review the comments received and prepare a revised version of the publication, together with a documented disposition of comments.

5.4 INFCOM-4 – meeting documents

Other documents and side events of potential interest to ET-DDS cover GBON, OSCAR/Surface, the Global Hydrological and Climate Data Centre, data policy, hydrology, the Global Ocean Observing System (GOOS), SOFF implementation of GBON and artificial intelligence.

6 DAYCLI Guidelines

Publication of the DAYCLI Guidelines as non-regulatory WMO material is planned for the next SERCOM Management Group meeting, scheduled for 3 December 2026. Publication could take place earlier, in November, through an exchange of messages among SERCOM Management Group members.
Access the demand for publication of the DAYCLI guidelines version of the 2026/10/12

7 What about Pacific for CDMSs, DAYCLI, Data Quality

The following updates were noted in relation to the Pacific region:

- The Bureau of Meteorology (BoM) has developed the CLIDE CDMS for the Pacific. A new release includes data-quality functionality.
- The need for greater international consistency in data-quality terminology and flagging systems was highlighted, with a suggestion to consider this in the next ET-DDS work programme.
- A WIS2 training session for the Pacific region, involving 15 countries, is planned for February 2027.
- Further details were to be provided by William Wright.

8 Activities suggestions for 2027-2028

Suggested Activity
Collaborate on the harmonization of WMO-No. 1238, WMO-N. 49, CDMSs, etc.
Collaborate on the definition and implementation of **Global Climate Data Centres**
Consolidation and strengthening of **RCC data and monitoring functions**
DAYCLI **capacity building and communications to NMHSs**. Prepare all necessary materials (video, presentation, information session, Workshop…)
Develop specifications for the for the DAYCLI software (e.g. Wis2Box)
Collaborate on further evolution of guidance on **data quality, climate indices, calculation of global and regional temperatures**, and its integration into WMO regulatory material
Collaborate with different WMO bodies in the **standardization of Climate Services** (work with the European Centre for Standardization CEN, ClimaEurope2, etc. Explore how WMO experts could participate to CEN/CENELEC standards, including the review of draft standards
Consultation and Exchange with NMHSs: Stewardship Maturity Matrix for Climate Data, Return periods (basic), etc.
Collaborate on different projects on **Data Rescue**, **homogenization**, etc. And prepare next events, workshops, Conference: ACRE, ESMO (Earth System Modelling and Observations), Homogenization, EUMETNET Data Management Workshop…

9 AoB

No additional items were recorded.

10 Date of next meeting

9 December 2026, 13:00-15:00 Geneva Time

11 Coming events

- ✓ **09-13 November 2026:** COP31, Antalya, Turkey
- ✓ **23-27 November 2026**: INFCOM-4
- ✓ **1-5 March 2027 (tbc)**: Executive Council 81
- ✓ **14-25 June 2027**: WMO Congress
- ✓ **5-9 July 2027 (tbc):** Executive Council 82
- ✓ **Early 2028**: SERCOM-5
